- Front slope 36mm comb

Delivered in a luxury case with 5 "special competition" chokes

DTS : Competition guns have an adjustable DTS-type stock, with micrometric adjustment. They allow the shooter the most precise adjustment: "an excellent way to achieve the sole objective: to break the targets!!!".

The New Caesar Guerini Summit Ascent combines everything you would expect from a modern sporting rifle!

The 10mm ventilated sight band is designed for a 50/50 point of impact, allowing for a straightened shooting position and better visibility.

The stock includes the DTS adjustable cheek rest to best adapt to the morphology of all shooters. The weights of the buttstock and the barrels are calculated for a perfect balance of the rifle.

These features and many other strengths make the Summit Ascent a rifle that takes sport shooting to a whole new level.
