G1631	Gamo HPA PCP rifle only	BJ980	C	.22 (5.5 mm)	10	40	285	48.5	113	899.00 € incl. tax

The PCP pre-compressed air rifle allows firing of 60 rounds at 40 joules with an air recharge. This configuration associated with a telescope and a bipod ensures precise shots while lying down or resting on a table. The sound moderator makes the shots particularly discreet.

- Pistol grip, adjustable comb and rubber butt plate
- 10 shots magazine and air tank with pressure gauge
- Silencer and Gamo 6-24 x 50 bezel
- HPA system

Delivered with: A manual air pump 200 bars and a hose for recharging on a diving tank.

The HPA system is a set of valves that will always have the same outgoing air flow at the start of the shots.

This creates an equal pressure on the volume of air moved so that the power will always remain constant.

However, thanks to this constant pressure, the weights will also be constant and generate a gain in precision that is rare on high power models.

- Relaxation safety
