The EAW pivot mount is freely configurable in height and eye relief
The rifle scope can be easily mounted and dismounted with just one hand, as the rear foot of our swivel mount automatically engages into the lock

- Adjustable and re-adjustable front and rear feet
- The large forefoot shear section (approximately 3 times more than the single hook assembly) prevents blocking and guarantees shooting stability, even for large calibers
- Horizontal adjustment via EAW pull-down bracket
- Vertical adjustment possible by simply replacing the lower part of the rear foot in 0.5 mm steps
- Vertical tolerance compensation for any existing tolerance on the weapon with an adjustable forefoot
- Constant striking (impact) position thanks to the total absence of tension in the field of application, even after repeated assembly and disassembly
  Ideal for binoculars and sighting devices
