Lunette de tir à réglage rapide avec tourelles de tir longue distance graduées.

Graduated reticle in the first focal plane, the reticle size varies according to the magnification as the image of the target, thus simplifying the calculations of shot corrections.

- Generously dimensioned anti-slip zoom ring
- 34mm Aircraft Alloy Bezel Body
- Tactical turrets with windage & elevation adjustment without tools
- Supplied with translucent lens covers
- Stadia type PRR illuminated reticle with graduation to compensate for warhead drop and drift
- Parallax adjustable from 10 m to infinity
- Adjustable diopter

A scope designed for long-range shooting (TLD) equipped with the most advanced technologies.

Its optical quality coupled with its large tube diameter, provide clear and bright image resolution.

The shooting corrections will be simplified thanks to its reticle in the first focal plane and its impact correction in Mrad, making it easier to calculate and estimate target corrections.

The stadia type reticle with its fine graduations, does not obscure the target even at long distance and allows you to correct your shot without modifying the position of its turrets, according to the wind and the fall of the warhead.
