

MADE IN USA

SKU	Designation	French Law	Mounting	MSRP
DDZ003	O'clock Daniel Defense 45 degree swivel rail	Vente libre	21mm rail	100.00 € incl. tax

The rail makes for mounting a red dot in addition to a telescope

Allows the mounting of a red dot simultaneously with a telescope or open sight.

- Aluminum Aerospace 6061-T6
- Mil-Spec Type III Hard Anodized
- Made in the USA

The DANIEL DEFENSE 1 O'clock Offset Rail is optimized to mount a compact red dot on the right or left of the rail. This type of mounting makes it possible to make transitions between the conventional sights (front sight or telescope) on the main rail, and the side of the rail on which it is possible to mount a red dot. The geometry of the system allows transitions between magnifying optics and optics without magnification and thus varying firing distances more easily.

This rail also allows the mounting of a lamp or any other accessory compatible with a picatinny rail.

- One-piece patented Rock & Lock system.
- Optimized for compact red dots.
- No need to peel off the cheek from the cheek rest
- Fast transitions
- Adaptable for adding other accessories
- Lightweight
- Aerospace Aluminum 6061-T6
- Mil-Spec type III Hard anodized
- Made in the USA
