SKU	Designation	French Law	Weight (g)	MSRP
AEQ556	Bolt Carrier Group - Ensemble mobile M4 Phosphaté 5.56mm OTAN	l	308	440.00 € incl. tax

Compatible with all AR15 complying with Mil-Spec!

- Machined from abrasion resistant 8620 steel and with an excellent coefficient of friction, increases the longevity of your weapon.
- Closing aid notches (forward assist) in order to be able to close the cylinder head even when dirty.
- Mil Spec phosphate coating, durable, it protects your bolt from friction and allows you to shoot more.
- Gas key with reinforced mountings and polished chrome striker channel.
- Carpenter 158 Steel-Chrome-Nickel Alloy Milled Bolt Head perfect for maximum use and long life.
- Cylinder head hardened by shot peening.
- Inspection and quality control by Magnetic Resonance Imaging, the assurance of optimal quality control to ensure you have a product of excellence.
- Insert for O-ring on extractor

Our goal is simple: technical perfection

Aero Precision's roots run deep in aerospace, and our drive for clean, perfect engineering and machining stems from that. When you're building something that's going to fly through the air, there's no room for error. We take the same approach in the firearms industry. Not all manufacturers have very low tolerance levels. Not all manufacturers personally oversee the development, design and machining of every part that comes off the line. We are not all manufacturers.

The state of the art at all levels

There's more to building a quality receiver than just how the end product looks. It's about how it feels, how it works, how it handles and how it performs. To ensure that each of these elements meets the Mil-Spec standard, we look at the product creation process on a holistic level. We push the boundaries of manufacturing and challenge the status quo by constantly seeking new ways to use, develop or evolve

existing processes. Through the personal design and engineering of state-of-the-art tooling in our workshop, we are able to harness the latest machine tool technology to provide you with the highest quality components.

Our investment, your benefit Rail-guided robotic equipment, new horizontal machining centers with sophisticated monitoring devices and hydraulic tooling to ensure constant loading. This equipment is standard in our workshop and illustrates our willingness to invest in our work. We design for total process control. We have made and continue to make the initial investment to produce the highest quality components day after day. Are there cheaper ways to make the same product? Sure. As an end user, would you see a difference in how it works? You better believe it. Better engineering makes better components. It's as simple as that.

<u>AERO PRECISION</u> is recognized worldwide for the quality of these weapons, and is an excellent manufacturer to Mil-Spec standards for custom AR15s.
