The Guérini Invictus III adds exceptional engraving, including Corinthian motifs, to the famous Invictus system which allows you to fire up to 1 million shots with your rifle!

This revolutionary new system completely changes the way the barrels and body of the weapon lock when the rifle is closed, making the entire system incredibly stronger.

For the first time, you can measure the lifespan of your rifle not by how long you can shoot it, but by how long your children and grandchildren will continue to use your gun!

- Adjustable Sporting stock - L. 377 mm - Non-contractual photo on the stock which is not a Monte Carlo stock
- Ventilated flat strip
- Rubber butt plate
- Comes with 8 long external chokes

- The wider rocker arm provides a larger contact area with the metal structure of the handguard, increasing strength while reducing friction.
- To reduce vibrations, an elastomer spacer was added between the release button and the wood of the handguard.

DPS Relaxation

The new **DPS (Durability, Precision, Speed) trigger system** includes innovatively designed hammers with new geometry and tighter tolerances.

Furthermore, the hammers benefit from industrial chrome plating designed to have a minimal coefficient of friction and allow for better lubrication. This makes the trigger mechanism durable, precise, and consistent.

Cames Invictus

The revolutionary **Invictus cams** eliminate traditional pivots and hinges.
This system makes the Invictus the first double-barreled shotgun that allows the point where the barrels and receiver meet to be moved. This allows the barrels to be moved back to eliminate any potential gap at the muzzle.

Invictus Lock

The **Invictus lock** significantly increases the locking surface between the barrels and the breechblock, dramatically extending the overall lifespan.
This part is also replaceable, thus increasing the mechanism's lifespan. The result is a shotgun that is not only more robust and durable from the outset, but also uniquely rebuildable among over-and-under shotguns.

DTS Action Control System

DTS Action Control System : To improve shooter comfort when opening and closing the shotgun, the forend has been redesigned to include a new patented mechanism called the DTS Action Control System. Using a 3mm Allen key supplied with each shotgun, shooters can adjust the degree of friction between the forend and the receiver to achieve the ideal balance of smoothness and firmness.

Also available in Trap, Trap Impact and Ascent versions

Invictus: adj. Latin meaning: unassailable, tireless, invincible.

*The engraving seen on Caesar Guerini Invictus III is a **fine engraving in the great Italian tradition** , executed with an **exceptional level of detail** . Here is the full description:*

- **Main motifs** : The receiver is entirely covered with a **floral and foliate decoration** in fine arabesques, typical of the Italian Baroque style. The scrolls intertwine harmoniously, with a blackened background that highlights the brilliance of the engraved steel.
- **Gold inlays** : Three mythological or animal figures are inlaid in fine gold:
- A **stylized lion** on the left, a symbol of power and nobility.
- An **eagle's head** in the center, representing precision and vigilance.
- A **winged goat figure or chimera** on the right, a symbol of strength and mystery. These gilt details stand out magnificently against the silver background, creating a luxurious contrast.
- **Finishes** : The set features a **satin polish** on the metal surfaces, with a **polished steel trigger guard** and a **gold-plated trigger tail** reminiscent of the gold inlays in the engraving.
- **General style** : The design is symmetrical, balanced, and demonstrates the **high-quality craftsmanship of fine gunsmithing** . This type of engraving is typical of prestigious rifles intended for hunting or high-level sport shooting.
