Collars with universal male Eratac attachment.

Eratac Universal Interface Rings to attach to the central tube or objective of the scope. Universal Eratac male mounts, which allow the safe and space-saving installation of various accessories. For mounting red dots, lamps, IR illuminators...

The middle tube rings are half split on both sides, and the lens rings are split only on one side. For scopes with rails on the center tube, however, only lens rings can be used. The width of the ring is 18 mm each.

The existing height of 3 mm can be increased if necessary by the use of spacers. When mounting on the telescopic sight, the radial position is freely selectable.

All rings are high strength aluminum and hard anodized to Mil-Spec. Type III matt black.
