LMP1019 multicolored LED flashlight delivered with 1 tip with remote switch, 1 tip with tactical switch, 1 rechargeable 26650 battery 4000 mAh 3.7 V, 1 Micro USB battery charger, 1 wrist strap and 1 user guide.

Maintenance :

Blow gently to remove any dust or debris from the lens (or use a soft lens brush). To remove dirt or fingerprints, clean with a soft cotton cloth in circular motions. Using a rough cloth or rubbing the lens unnecessarily can scratch it and cause irreversible damage if necessary. For a more thorough cleaning, use a special lens cloth and a photographic-type lens cleaning liquid, or isopropyl alcohol. Always apply the liquid to the cloth and never directly to the lens. Cleaning your flashlight contacts from time to time improves flashlight performance. Dirty contacts can cause the flashlight to flicker, turn on intermittently, or not turn on at all. Every 6 months, clean the threads of the battery compartment cover and flashlight tube with a dry cloth, then apply a thin coat of silicone lubricant to the rubber O-ring. Never remove the lens head or any of the internal components. You could damage the flashlight and void your warranty.

Precautions for use:

Fully charge the battery before first use. The LMP1019 Multicolor LED Flashlight is a high intensity lighting device capable of causing eye damage. Avoid shining the light directly into someone's eyes.

The run time of your flashlight depends on whether it is used continuously or intermittently. Intermittent operation extends battery life.

The LED is a light source that will operate for the life of the lamp. It will never need to be replaced. Remove the battery when not using the light for an extended period. Since the LMP1019 multi-color LED flashlight is a light-intensive flashlight, it can reach high temperatures. It is normal for the aluminum body of the lamp to become very hot during continuous use. Keep her away from children. Handle it with care.
