A compact and high-performance silencer

The RECKNAGEL SOB3 is a sound moderator designed to offer **exceptional acoustic reduction**, with up to **33 dB measured according to the DEVA protocol**. Its compact design limits the total extension of the weapon, with only **105 mm protruding from the barrel**.

Advanced technology for maximum efficiency

Thanks to its **stainless steel mesh** combined with **aluminum baffles**, the SOB3 eliminates the "**first-round-pop**" phenomenon (louder noise on the first shot). This guarantees **consistent discretion**, shot after shot.

Robust and ergonomic design

Machined from **aluminum alloy** with MIL-SPEC surface treatment, this moderator withstands the most demanding conditions. Its weight of **330 g** and its diameter of 50 mm make it an accessory both robust and easy to handle. It can be **disassembled into two blocks** , greatly simplifying cleaning and maintenance.

Versatility and compatibility

- **Max. barrel diameter:** 22.5 mm
- **Suitable for magnum calibers** (from 58 cm barrel length)

Shooting comfort and longevity

The SOB3 effectively reduces recoil and **muzzle flash** , improving shooter comfort and shooting stability. Built to last, it resists wear and high temperatures. Its **optional ERA@LOC** system allows for quick and secure mounting.

An ideal choice for modern hunters looking for a **compact, high-performance, easy-to-maintain** silencer.
