A high-tech left-handed ball trap rifle

A revolutionary system for a perfect locking and a lifespan of the weapon increased by 200 to 300%.

Adjustable cams replace the classic trunnions and strengthen the lock for a trap rifle that can fire up to 1 million shots.

- Rocker with reinforcing cheeks with marbled effect and fine engravings.
- Solid walnut pistol grip and trap front with hand oiled sanded finish
- Adjustable stock to adapt to the morphology of the shooter
- 6mm high flat ventilated aiming strip
- 6 MAXIS Competition chokes
- 5 " DuoCon connection cone
- The wider rocker offers a larger contact surface with the metal structure of the handguard, increasing resistance while reducing friction.
- In order to reduce vibrations, an elastomer interlayer has been added between the release button and the wood of the handguard.

DPS relaxation

The new **DPS** (Durability, Precision, Speed) trigger features innovatively designed hammers with new geometry and tighter tolerances.

In addition, the hammers benefit from an industrial chrome plating designed to have a minimum coefficient of friction and allow better lubrication. This makes the trigger mechanism durable, precise and regular.

Invictus cams

Revolutionary Invictus cams do away with traditional journals and hinges.

This system makes the Invictus the first rifle with double barrel which allows to move the point of connection of the barrels and the seesaw. This allows the cannons to be retracted to eliminate a potential thunderous day.

Invictus Lock

The **Invictus lock** significantly increases the locking surface between the barrels and the rocker, incredibly extending the life of the assembly.

This part is also replaceable, thus multiplying the longevity of the mechanism. We thus obtain a rifle which, from the beginning, is more resistant and durable, but which in addition can be rebuilt in a unique way among the superimposed ones.

DTS Action Control System

DTS Action Control System : To improve shooters' comfort when opening and closing the rifle, the handguard has been redesigned to include a new patented mechanism called the DTS Action Control System. Using a 3mm Allen key supplied with each shotgun, shooters can adjust the degree of friction between the front and the rocker to achieve ideal flexibility or firmness.

Invictus: adj. Latin meaning: unassailable, indefatigable, invincible.
