A revolutionary system for perfect locking and weapon life increased by 200 to 300%. Adjustable cams replace the classic trunnions and reinforce the bolt for a trap shotgun that can fire up to 1 million rounds.

- Seesaw with reinforcement cheeks with marbled effect and fine engravings.
- Pistol stock and trap forend in solid walnut with oil rubbed hand finish
- Half high ascent sight band
- 5" DueCon connection cone

The wider receiver provides a larger contact surface with the metal structure of the handguard, increasing resistance while reducing friction.

In order to reduce vibrations, an elastomer spacer has been added between the release button and the wood of the handguard.
