A rigid and adjustable frame for long range shooting and PRS

- Machined from 6061 aluminum alloy with anodized finish
- Interchangeable insert kit
- "Plug and Play" bedding system that does not require the intervention of a gunsmith for assembly
- Stock adjustable in length
- Height adjustable cheek piece
- M-LOK fastening system
- AR-15 standard handle
- Compatible with AICS chargers

ORYX frames are manufactured by MDT whose reputation is well established in the TLD industry.

This beam frame brings both great rigidity to the whole for better stability when shooting.

Its contained weight makes it perfectly suited to the new shooting discipline, PRS.

Resting only on the breech housing, the floating barrel brings great precision to firing and formidable groupings.

The adjustable butt in height and length allows a perfect adaptation to the morphology of the shooter.

Its bedding system allows the assembly of the canned action easily, without requiring the intervention of a gunsmith to adapt it.

You only have to see the praise given to the MDT and ORYX products on the various shooters 'forums to realize the quality of the chassis' workmanship.

An excellent product for the customization and personalization of a long range rifle.
