The must have sound moderator from STALON with its sound reduction of 31 dB.

- Projects 108 mm from the barrel

The top of the range sound reducers developed for hunting rifles.

- Machining in matte black anodized aeronautical aluminum alloy
- Stainless steel baffle and thread
- Incredible 31 dB sound attenuation (.308 caliber)
- Barrel covering system with rear gas decompression chamber
- Significant recoil reduction
- Exceptional durability
- Front part of the silencer interchangeable to adapt to several calibers
- Maximum barrel diameter: 22.5 mm

An elegant silencer with impeccable finishes.

Its telescopic design with barrel covering allows mass distribution providing overall rigidity and prevents any deformation of the barrel that could bend under the weight of the silencer.

This allows you to maintain incredible precision, while practicing shots with absolute discretion.

The strong point of STALON silencers is the right balance between acoustic performance, weight, ease of assembly and size.

- Diameter: 49.1mm
- Length: 27cm
- Weight: 370g
- Projects 108 mm from the barrel

Equip yourself with the best silencer for hunting, especially for hunters approaching or lying in wait.

The STALON XE108 takes the already incredible performance of the X108, to improve it even further.

In order to measure the sound attenuation power of their silencer, STALON relied on a strict military protocol, MIL-STD-1474D. This protocol is used in military equipment and allows the capacity of a sound moderator for assault rifles and war weapons to be measured precisely and not erroneously.
