### The big brother of the X149 with even greater efficiency

- 149mm protrudes from the barrel
- Diameter: 49.1 mm
- Length: 311 mm
- Weight: 428g

A sound moderator specially designed for hunting.

- Made of high quality aeronautical aluminum with black anodized body
- first stainless steel baffles
- Incredible 34.5 dB noise reduction

- Telescopic system with barrel cover for reduced overall length
- Front part of the silencer interchangeable according to the caliber of the rifle.
- Significant recoil reduction with its rear gas decompression chamber
- Significant durability
- Maximum barrel diameter: 22.5 mm

An elegant sound reducer with incredible finishes

Its telescopic operation with barrel covering allows a distribution of masses providing rigidity and prevents any deformation of the barrel which could bend under the weight of the sound moderator.

This allows for incredible accuracy while still allowing for stealth shooting.

The strong point of STALON silencers is the right balance between acoustic performance, weight, ease of installation and space requirement.

Equip yourself with the best silencer for hunting, especially for hunters stalking or lying in wait.

The STALON X149 stands out for its greater acoustic attenuation.

Just like the X108, its front part is interchangeable, allowing you to have only one silencer for all your hunting rifles with several front parts adapted to each caliber.

In order to measure the sound attenuation power of their silencer, STALON relied on a strict military protocol, MIL-STD-1474D. This protocol is used in military equipment and allows the capacity of a sound moderator for assault rifles and war weapons to be measured precisely and without error.

Find the detailed protocol details by [clicking here](#).
