An essential accessory to protect your silencer

The **STALON neoprene cover** is designed to protect your silencers from **scratches, bumps, and unwanted noise** caused by branches or equipment. It also provides an effective thermal barrier, reducing and delaying the appearance of **mirage in the optic** after several shots.

Compatibility and lightness

Available for several ranges, it adapts perfectly to STALON silencers:

- **X-Series & W-Series:** weight 36–40 g
- **Victor-Series:** weight 27–30 g
- **Thickness:** 2 mm Cordura reinforced neoprene

Thanks to its fitted design, it adds virtually no weight and maintains the **weapon's maneuverability**.

Increased comfort for shooting

In addition to providing mechanical protection, the cover improves the shooting experience by **limiting the heat visible through the scope** , which is a bothersome phenomenon during repeated shots. This feature makes it particularly useful for hunters on the lookout or sport shooters practicing extended sessions.

STALON quality and robustness

Made from **high-quality neoprene** with **Cordura reinforcement** , it is designed to withstand the harsh conditions of hunting and outdoor shooting. Its elegant black finish harmonizes with STALON silencers for a sleek and professional look.

A simple but essential accessory to extend the life of your STALON silencers while improving your shooting conditions.
