Compactness and maneuverability

The **Fabarm Martial Ultrashort** stands out for its compact size: only 62.5 cm in total length. With no stock, it is equipped with a pistol grip that reduces bulk and improves handling speed.

Tribore barrel with jacket and heat shield

The 36 cm barrel benefits from the **Tribore** profile, an internal machining in three progressive sections improving the speed of the projectiles and reducing their deformation. The jacket and the heat shield protect the user during sustained shots.

Interchangeable chokes

The rifle comes with a **multichoke** , including a cylinder choke, allowing you to adapt the firing pattern according to your needs and the ammunition used.

Ergal 55 frame

Made from **Ergal 55** , an aluminum alloy renowned for its lightness and strength, the frame offers optimal resistance. Its matte black bronze finish limits reflections and reinforces its durability.

Simple and robust ergonomics

The **black polymer composite** handle provides a firm and secure grip. The reliable and responsive single-action trigger contributes to smooth and intuitive operation.
