 - KASTELBERG heavy bipod
- Delivered in a PVC case, model depending on arrival

A bolt-action rifle dedicated to long-range shooting. The quality of its action and its gun, allows to obtain an incredible precision and excellent target groupings.

Its configuration makes it totally adapted to the new discipline of precision shooting: the PRS (Precision Rifle Series)

The TSPX Chassis brings a tactical and clean design to the whole. Its aeronautical aluminum design brings both significant rigidity to the assembly, for stable shots, but also lightness for more dynamic shots.

Its stock length is adjustable by means of a stock spacer and the cheek rest is also adjustable, in order to adapt to the morphology of each one as well as a different shooting positions (lying down, sitting, on support)

Its heavy KASTELBERG bipod provides great shooting stability regardless of the terrain.

Non contractual photo. The bezel changes depending on the option chosen.
