MET1260	Mountain. Monobloc 3D BLACK EAW diam.30mm BH18 mm	Vente libre	12.2	30	1.8	175	21mm rail	1020.00 € incl. tax

An aeronautical aluminum assembly machined by 3D printing providing both rigidity, durability and significant weight reduction of around 30 to 40%.

- Innovative machining by laser 3D printing
- High quality aircraft aluminum alloy
- For 30mm body scope
- Height 18mm
- 21mm picatinny/weaver rail mount
- Locking of the bezel by 4 torx screws

In addition to its innovative and modern design, its design by 3D printing in the cell brings a significant weight saving of around 30 to 40% compared to similar one-piece clamps.

This weight gain in no way affects the solidity and rigidity of the assembly, which has been the subject of numerous resistance tests.

A mounting system suitable for shooters and hunters on the hunt for grams.
