Length: 124 mm / 4.88"
Width: 21 mm / 0.83"
height: 21 mm / 0.83"

Weight : 60 gr.

Rottigni Officina Meccanica, or ROME, is an Italian company located near Bergamo (Lombardy), specializing in high-end accessorization of Victrix precision weapons.

Its philosophy is based on constant innovation and the use of high-precision technologies to create products with an immediately identifiable aesthetic. The firm's premises extend over 3,000 square meters, and include around thirty CNC machines, at the cutting edge of current technology. But this is still not enough for ROME, which also employs some of the most talented workers and engineers to finish the brand's products by hand, for an impeccable fit.

Each Victrix weapon, already considered among the best in the world, thus equipped with this equipment, becomes a real jewel in the hands of the most demanding shooters by their profession or their sporting practice. The ROME-Victrix couple has become in the field of firearms what the RUF-Porsche and AMG-Mercedes couples were in the automotive field: a synonym for performance, reliability, and excellence.
