### Monobloc Decumanus scope mount for Victrix rifle.

Decumanus one-piece assembly in 6082 aluminum alloy provided with RAUC anchor points for mounting specific accessories.

The tightening order is numbered to guarantee optimal grip on the bezel. Treated with an anti-reflective and salinity resistant coating.

**Not compatible with Hensoldt ZF 3.5-26x56 glasses**

One-piece riflescope mount. Each mount is machined from a single block of lightweight 6082 aluminum.

Equipped with RAUC anchor points for mounting specific accessories.

The tightening order is numbered to guarantee optimal grip on the bezel.

Treated with an anti-reflective and salinity resistant coating.

When choosing your mount from the list below, the first number in the "key" corresponds to the diameter of the scope, and the second to the height of the mount.

**Please note, one-piece system incompatible with Hensoldt ZF 3.5-26x56 glasses**

Rottigni Officina Meccanica, or ROME, is an Italian company located near Bergamo (Lombardy), specializing in high-end accessorization of Victrix precision weapons.

Its philosophy is based on constant innovation and the use of high-precision technologies to create products with an immediately identifiable aesthetic. The firm's premises cover 3,000 square meters, and include around thirty CNC machines, at the cutting edge of current technology. But this is still not enough for ROME, which also employs some of the most talented workers and engineers to finish the brand's products by hand, for an impeccable fit.

Each Victrix weapon, already considered among the best in the world, equipped with this equipment, becomes a real jewel in the hands of the most demanding shooters due to their profession or their sporting practice. The ROME-Victrix couple has become in the field of firearms what the RUF-Porsche and AMG-Mercedes couples were in the automobile field: a synonym for performance, reliability, and excellence.
