The XLR BULRUSH MAX 5 shotgun is primarily a shotgun designed for waterfowl hunting with a Bulrush Max 5 camo finish!

The Fabarm XLR Bulrush Max 5 shotgun is a semi-automatic hunting shotgun chambered in 12/76 gauge, ideal for waterfowl hunting. The Ergal receiver reduces the weight of the weapon while maintaining exceptional strength.

The stock and handguard benefit from the Soft Touch coating, a unique treatment to improve grip in the most extreme weather conditions.

The TRIBORE HP barrel, shown here in a 76 cm length, offers increased penetration by utilizing the Venturi principle; it is ideal for long-range shooting. This barrel, patented by FABARM, also allows the firing of steel shot cartridges in all chokes larger than 1/2 choke, including FULL.

For better weapon handling during firing, the weapon is equipped with a pistol grip stock.

Weighing 3.20 kg, this weapon will absorb a significant portion of the recoil when firing, relieving the hunter's shoulder.

- 6mm sighting band with fiber optic front sight.
