Develop your detection skills along with your spotting scope.

The Clip C series is designed to attach to any standard type of day scope. There is no need to reset, just squeeze and pull. This is a dual-use camera as it can be transformed into a professional monocular with the supplied standard eyepiece in seconds.

High image quality

The high-performance IRay Vox detector and advanced image processing deliver bright, sharp images.

Ultraclear Mode

Built-in Ultraclear mode for bad weather conditions such as heavy fog and rain, it will be more sensitive and get more details.

AMOLED micro-screen

The high-contrast, HD-resolution AMOLED micro-display delivers a sharp image and vivid colors. The screen ensures excellent image quality and flawless performance, even in freezing temperatures.

No reset required and quick fixing

Thanks to the special camera calibration, no resetting is necessary after attaching to the day scope. Clamp and Shoot, super simple to use.

Compact size and light weight

The compact size and lightweight design do not influence the balance of the rifle significantly.

Familiar precision

The front mount allows for a shooting position and eye relief consistent with an existing day scope. The original design and precision technology guarantee the stability of the POI when the accessory is used. Users

do not need to correct the day scope reticle position when mounting the Clip C Series.

Rapid Transformation

The Clip C series is a dual-use camera as it can be transformed into a professional monocular with the supplied standard eyepiece in seconds. It can be used as a thermal monocular for research or as an accessory to a rifle scope for shooting.

Wireless remote control

The wireless remote control can be attached near the shutter button, making it easy to perform basic operations.

Integrated accelerometer and digital compass

The built-in accelerometer and digital compass improve accuracy by precisely identifying inclinations and angles. The Clip C series can indicate the direction and degree of lateral tilt. The Bluetooth-connected wireless remote control can be attached near the shutter button, making basic operations easy to perform.

Features:

- Sensor resolution: 640x512 px
- Pixel size: 17µm
- NETD: 240mK
- Refresh rate: 50Hz
- Lens Ø: 50mm
- Field of view: 8.8°x7.0°
- Magnification: 1x
- Display: OLED
- Display resolution: 1024x768 px
- Power supply: CR123 x2
- Battery life: 3.5h
- Weight: 420g
- Dimensions: 166x60x68mm
- Thread: M52x0.75
- Detection range: 2597m
