OI6010	Infray Thermal Imaging Series Finder - FH25R	Vente libre	13	7	5.2	320	1x	4x	3149.00 € incl. tax 2204.30 € incl. tax

The Finder series has a built-in laser ranging module, which can quickly and accurately capture and display the target distance.

Finder series products are lightweight and easy to carry. They are particularly suitable for one-handed use and can be slipped into a pocket anytime, anywhere.

Fully improved image quality

The 12μm 640×512 thermal sensor has been improved to achieve higher thermal sensitivity, with a NETD of less than 20mk. In combination with the enlarged F0.9 aperture which allows more radiation, Finder V2 is able to capture perfect details in difficult conditions.

LRF agile and precise

The Finder V2 has a built-in LRF up to 800 meters with a margin of error of 1 meter. The response rate is very fast, accurate telemetry results can be presented without delay. LRF technology makes it possible to measure the distance of an object using a laser beam.

Replaceable batteries with 11 hours of battery life

Finder V2 is equipped with two lithium-ion batteries, which can be replaced easily even in a dark environment. The total battery life is up to 11 hours, and the charger supports in-vehicle charging, allowing you to enjoy uninterrupted observation.

Most refined body design

The Finder V2 maintains the pocket-sized design, IP67 waterproofing and dust protection, while optimizing the button material. The upgraded silicone button can still maintain a soft touch in cold temperatures.

Features:

- Resolution: 640x512 px
- Pixel size: 12µm
- NETD: ?20mK
- Refresh rate: 50Hz
- Lens Ø: 35mm/F0.9
- Field of view: 10.5°×7.9°
- Magnification: 2~8x
- Detection range: 1800m
- Display type: AMOLED
- Display resolution: 1024x768 px
- Battery: Replaceable Li-ion
- Laser rangefinder: 800m
- Protection rating: IP67
- Microphone: yes
- USB: Type-C
- Memory: 32Gb
- Wifi: yes
- Weight: 400g
- Dimensions: 160x90x50
