The Sporting RS Fabarm shotgun with an increased adjustable stock, a Tribore HP barrel and 97 mm hyperbolic chokes.

Developed from the ELOS N2 SPORTING shotgun, whose international commercial success has been confirmed since its launch, the goal of this RS version is to improve upon what was already near perfect. The stock's contour has been increased at both the comb and the pistol grip, its greater mass allowing for a more rearward balance. The forend features a rounded profile for a perfect grip, ensuring accurate shooting on all clay target trajectories. The walnut used is of higher quality, and the "oil-finished" surface beautifully showcases its beauty. This RS version, aimed at more experienced shooters, naturally features a TRIBORE HP barrel drilled from a solid block, 97mm hyperbolic chokes, an adjustable trigger position, an adjustable comb, and very elegant engraving with two-tone logos. The shotgun can fire steel shot cartridges in all chokes, including the 9/10 XTREME.

- Satin-finished blued barrels, 76 cm, Tribore HP 1630 Bars (high-performance steel shot proofed)
- 4 Exis HP 97 mm Chokes included (Short-Medium-Long-Xtreme)
- Handlebar: white round + intermediate barleycorn
- Satin black forged steel rocker arm - Selective single trigger (MDS) Racing
- Ejector mechanisms
- Pistol grip stock with adjustable cheek piece - Stock length: 377mm
- Slope at the busk: 37mm - Slope at the heel: 57 mm
- Delivered in an ABS case

The RS is an evolution of the Elos N2 Sporting, a model which has enjoyed international success since its launch. In order to improve what was already almost perfect, the RS model has an increased stock both at the cheekpiece and the pistol grip. Its mass being greater, allows for a balance more oriented towards the rear of the weapon. In order to guarantee a perfect grip and a

precise shot over the entire trajectory, the front takes on a more rounded profile. The walnut, here of better quality, is highlighted by a perfectly worked sanded-oiled finish. This RS version, aimed at more expert shooters, is therefore juxtaposed alongside the N2 sporting version already available in gunstores.

Fabarm rifles are tested at 1630 Bars (i.e. 340 Bars more than the Saint-Etienne steel ball test). It is therefore possible to fire HP (High Performance) steel ball cartridges with these rifles. In addition, the design of the Inner HP and EXIS HP chokes (FABARM registered trademarks) allows the firing of steel balls with chokes superior to the Half-Choke while respecting CIP standards (Fabarm exclusivity).
