A pump-action shotgun with a very strong personality and many innovative technical features, starting with its very linear configuration.

The PRO FORCES stock features a cheek piece for extremely quick and instinctive target acquisition. The nylon sights are adjustable and flip-up. It also boasts a highly innovative sling swivel system, whose anchoring allows the sling swivel to be freely moved from 9 to 12 o'clock depending on the phase of use. The aesthetics are particularly refined, with a barrel shroud, a muzzle brake, a CERAKOTE Carbon Grey finish, and a two-tone logo. FABARM's expertise has also been demonstrated in offering this version in Category C with a 61 cm rifled barrel and a 4+1 round capacity without compromising the superb tactical look of this weapon.

- **caliber:** 12/76
- **stock:** Pro Forces fixed composite
- **rail:** Cantilever fixed to the barrel
- **Test pressure:** 1630 bar

Heavy-duty pump-action shotgun with cantilever rail and Pro Forces stock.

The **Fabarm** brand has established itself as a benchmark in modern pump-action shotguns. With the **SDASS Pro Forces Stage 2** , it offers a reliable, comfortable weapon suited to shooters seeking precision and durability.

The **Fabarm SDASS Pro Forces Stage 2** is a Category C pump-action shotgun designed for sport shooting. Featuring a straight, parallel-slope stock and a rifled barrel with a muzzle brake, it combines precision, comfort, and robustness. The cantilever rail, mounted directly on the barrel, is compatible with large optics. It offers a secure mount and allows the scope's zero to be retained even after disassembling the shotgun. The barrel has a very long twist rate for tight shot patterns.

Parallel slope crossbow

The **Pro Forces stock** features a very straight line, known as a "parallel slope". This configuration reduces muzzle rise and ensures optimal stability during intensive firing series.

Long-range rifled barrel

The 61 cm barrel, rifled with a very long twist, produces tight and consistent shot patterns. The integrated **muzzle brake** reduces recoil and improves weapon control.

Rail cantilever

The **Picatinny cantilever rail,** fixed directly to the barrel, allows for the mounting of heavy optics. Its design retains the zero even after barrel removal, ensuring an immediate return to the range.

Materials and finish

The **7075 T6 aircraft-grade alloy frame** combines lightness and strength. The **Cerakote Carbon Grey** treatment protects the weapon against wear, corrosion, and impacts.

Aiming and ergonomics

The **flip-up sights** (adjustable and folding rear and front sights) ensure rapid target acquisition. The recoil spring integrated into the handguard facilitates smooth and quick reloading.

- **Frame:** 7075 T6 Aluminum
- **Finish:** Cerakote Carbon Grey
- **Sights:** Adjustable flip-up
- **reset:** integrated return spring
- **Test:** 1630 bar steel balls
- **Packaging:** cardboard box
