Heavy-duty pump-action shotgun with cantilever rail and Pro Forces stock.

The **Fabarm SDASS Pro Forces Stage 2** The cantilever rail, attached directly to the barrel, is compatible with massive optics. It provides a robust mount and allows the optics to be adjusted even after disassembling the shotgun. The barrel has a very long rifling pitch to allow for tight pattern shots.

Parallel slope cross

The **Pro Forces stock** adopts a very straight line, called "parallel slope". This configuration reduces the rise of the barrel and ensures optimal stability during intensive series of shots.

Long-range rifled barrel

The 61 cm barrel, rifled with a very long pitch, allows for tight and regular bursts. The integrated **muzzle brake** limits recoil and improves control of the weapon.

Cantilever rail

The **cantilever Picatinny rail** attached directly to the barrel allows for the mounting of heavy optics. Its design retains the adjustment even after disassembly of the barrel, ensuring immediate return to the range.

Materials and finish

The **7075 T6 aircraft alloy frame** combines lightness and strength. The **Cerakote Carbon Grey** treatment protects the weapon against wear, corrosion, and shock.

Aiming and ergonomics

The **flip-up sights** (adjustable and folding rear sight and front sight) ensure rapid target acquisition. The return spring integrated into the handguard facilitates smooth and rapid recocking.

- **frame:** 7075 T6 aluminum
- **finish:** Cerakote Carbon Grey
- **sights:** adjustable flip-up
- **reset:** integrated return spring
- **test:** steel balls 1630 bar
- **packaging:** cardboard box
