NUM531	NUM'AXES - PIE1046 4G Trap Pack (with batteries, with SD, without SIM)	Vente libre	7.6	11.7	14.8	696	LR-6 - AA	399.00 € incl. tax

Sending photos by MMS and Emails. Ready-to-use pack, requires a SIM card.

This camera trap allows surveillance of its territory (forest or house) with sending images by MMS or Email.

- Color LCD screen
- Flash with invisible black LEDs
- Photo resolution: 8MP - 12MP - 24MP - JPEG format
- Video formats: WVGA - HD 720 P - FULL HD 1080 P
- Wide detection and shooting angle: 100°

Works with 2G, 3G, 4G networks and free mobile app (Android/IOS)

Delivered in pack with 8 LR6 batteries + 32 GB SD card. Requires a SIM card.

Characteristics of the PIE1046 camera trap

- **Wide shooting angle: 100°**
- PIR sensor (motion detector):
 - **Wide detection angle: 100°**
 - Detection distance: about 20m
 - Adjustable detection sensitivity: low / medium / high
- Infrared flash:
 - Invisible black LEDs
 - Range: approximately 20 m
 - Possibility of inhibiting part of the LEDs:
 - helps avoid overexposed night photos/videos

- useful if you want to place the camera close to the subject to photograph/film
 - Infrared flash with automatic activation depending on brightness
 - Adjustable night mode: a longer or shorter exposure allows you to increase or decrease the range of the infrared flash
- Recipients of photos and/or videos:
 - You can enter 1, 2, 3 or 4 mobile phone numbers (recipients will only receive MMS and therefore only photos, no videos)
 - You can enter 1, 2, 3 or 4 email addresses (recipients will receive MMS or emails depending on the chosen parameters and therefore photos and/or videos)
- **Sending photos :**
 - by MMS: you can send photos only in small format (640x480) by E-mail (FTP or SMTP): you can choose the size of the photos sent
 - by email: small size (640x480) large size (1920x1440) original size (8 MP, 12 MP or 24 MP depending on the selected photo resolution)
- **Sending videos :**
 - by E-mail (FTP or SMTP) only and if the 4G network is available where you installed the camera trap.
- Possibility of **configuring and triggering the device remotely using a free mobile application** (Android/iOS) - Application name: NumCam
- When the SIM card is inserted, **the device automatically detects the mobile operator and enters the corresponding MMS/email sending parameters** (only if the operator is part of the list of operators pre-programmed in the device).
- **Remote antenna supplied :**
 - allows better reception in areas where there is little network
 - antenna height: 22 cm - cable length: 2 m - magnetic base
- Capture modes:
 - Photo: 1 to 5 photos per trigger
 - Video with audio: programmable duration from 5 to 59 seconds
 - Photo + Video with audio: a photo then a video are taken each time the trigger is triggered
- Photo resolution: 8 MP / 12 MP / 24 MP
- Photo file format: JPEG Video resolution: WVGA / HD 720P / Full HD 1080P
- Video file format: MOV **PIR detection mode** : the device takes photos or videos when the passive infrared (PIR) sensor detects activity in the area it covers
- **Time Lapse Mode** : Photos or videos are taken automatically at regular time intervals during a user-defined time window
- **Hybrid mode** : operation by PIR detection + operation in Time Lapse at the same time
- Marking on photos: time, date, temperature, moon phase, device identification number, battery level, GPS coordinates of the photo
- Memory: SD or micro SD card with adapter from 4 GB to 32 GB, class 10 minimum (not included). The device also works with the NUM'AXES brand micro SD card with 64 GB adapter. 64 GB memory cards from other brands may not work. You can obtain micro SD cards with adapter at any time on this site (8 GB, 16 GB, 32 GB or 64 GB).
- **Loop recording on memory card :**
 - User programmable: ON/OFF
 - When the memory card is full, the camera records new photos/videos by deleting the oldest photos/videos.
- Programmable device identification number: allows you to identify where and by which device a photo was taken, which can be very useful if you have several devices.
- Programmable password

Reliable and efficient

- 2 years warranty
- Designed to withstand bad weather (IP66)
- Trigger speed: approximately 0.4 seconds

Ergonomics of the PIE1046 camera trap

- Weight: 418 g (without batteries) - 696 g (with batteries)
- Dimensions: 148 x 116.5 x 75.5 mm Remote antenna supplied
- Power supply: 12 AA alkaline batteries or 12 AA Ni-MH rechargeable batteries (not included) - **You can obtain these batteries at any time on this website.**
- Optional external power supply: power supply or solar panel
- 2.4 inch (~ 5 cm) color LCD screen: for easy adjustments and viewing photos and videos
- USB 2.0 port for downloading files
