CG5902G	Left-handed	CD887	C	cal. 12	70 mm	2	ST	Eject.	8 C.I. / SP	8 499.00 € incl. tax

The Guerini Invictus ArtCo adds modern engraving to the famous Invictus system that allows you to fire up to 1 million rounds from your rifle!

This revolutionary new system completely changes the way the barrels and body of the weapon lock when the rifle is closed, making the entire system incredibly stronger.

For the first time, you can measure the lifespan of your rifle not by how long you can shoot it, but by how long your children and grandchildren will continue to use your gun!

- Adjustable Trap stock - L. 377 mm
- Adjustable half-high band
- Rubber butt plate
- Comes with 8 long external chokes

- The wider rocker provides a larger contact surface with the metal structure of the handguard, increasing resistance while reducing friction.
- To reduce vibrations, an elastomer spacer has been added between the release button and the wood of the handguard.

DPS Relaxation

The new **DPS** (Durability, Precision, Speed) trigger features innovatively designed hammers with new geometry and tighter tolerances.

In addition, the hammers benefit from industrial chrome plating designed to have a minimum coefficient of friction and allow better lubrication. This makes the trigger mechanism durable, precise and regular.

Invictus Cams

Revolutionary **Invictus cams** eliminate traditional trunnions and hinges.
This system makes the Invictus the first double-barreled rifle that allows the connection point of the

barrels and the action to be moved. This allows the cannons to be moved back to eliminate a potential thunderstorm.

Invictus Lock

The **Invictus bolt** significantly increases the locking surface between the barrels and the action, incredibly extending the life of the assembly.
This part is also replaceable, thus increasing the longevity of the mechanism. This results in a rifle which, from the outset, is more resistant and durable, but which can also be rebuilt in a unique way among over-and-over rifles.

DTS Action Control System

DTS Action Control System : To improve shooter comfort when opening and closing the rifle, the handguard has been redesigned to include a new patented mechanism called the DTS Action Control System. Using a 3mm hex wrench included with each rifle, shooters can adjust the amount of friction between the forend and action to achieve the ideal softness or firmness.

Also available in Trap, Trap Impact and Ascent versions

Invictus: adj. Latin meaning: unassailable, indefatigable, invincible.
