Microdot Tactical Scope for Long Range Shooting with First Focal Plane Reticle.

Due to the ease of use of the metric system, the MRAD is the standard for military and police scopes. For this reason, it is also preferred by most tactical precision shooters.

First Focal Plane (FFP) scopes place the reticle in front of the erector. They are specifically designed for tactical shooters and hunters where the distance to the target changes and is often unknown. With an FFP reticle, the size of the reticle appears to change as the scope magnification is changed but remains proportional to the size of the target.

Comes with 76mm lens hood tube, 1 zoom lever & lens cloth.

Magnification: 6-24x

Objective Lens Dia. : 50mm

Tube diameter: 30 mm

Click value: 1/10mil

Reticle: mil

Illumination: N/A

Field of view: 18 to 4.55 feet at 100 yards

Eye relief: 3.4-3.9 inches

Lens Coating: Fully Multi-Coated

Parallax adjustment: 100 yards

Finish: matte

Distance between objective part and middle turret: 40mm

Distance between the central part of the turret and the feed ring: 32mm

Fast focus eyepiece diopter compensation (+2 to -2.0)

- 30 mm monotube.
- 1/10 MIL or 1/4MOA windage and elevation adjustment for tuning accuracy.
- Ultra short, 270 mm, 10.3 in

- 4" Long Eye Relief.
- Turret locking system. Pull to adjust, press to lock.
- Side Focus starts at 10 Yard.
- Eyepiece for quick and easy reticle focusing
- Sealed and nitrogen-purged O-ring ensures water resistance and anti-fog performance; shockproof at 750g.
- Waterproof to 1m.
- High quality 6061 T6 aircraft grade aluminum alloy with a durable matte black finish.
