Foldar offers its range of folding AR15s for more compact transport.

With FoldAR's patented folding upper, the FoldAR platform gives you the highest level of compactness possible for an AR15 rifle without sacrificing any area of performance, reliability, weight or safety. Deployment and stowage takes just seconds and is an extremely simple and reliable process, allowing you to quickly and efficiently carry and transport the rig in a way never before!

The model with a 9" (22.86 cm) barrel is the most popular among users thanks to its ability to be stored folded in a 16" (40cm) backpack.

- Pistol grip
- caliber 5.56x45 NATO (.223 Wylde)
- Total length: 62.9 cm
- Folded length: 37.5 cm
- Gas borrowing: Fully adjustable (diameter 1.90 cm)
- MilSpec Diamond Like Coating Carcass
- M-Lok Rail

The .223 Wylde chamber is a hybrid chamber designed to allow .223 caliber guns to safely fire .223 Remington and 5.56 x 45mm NATO. Although the dimensions of both cartridges are the same, the 5.56 NATO loads produce pressures higher than the specifications of .223 Remington. The 5.56 chamber has angular differences that allow higher pressures, so .223 Remington can be fired from a 5.56 chamber safely, but with reduced accuracy. The Wylde design allows both calibers to be fired safely with good accuracy.
