The Daniel Defense AR15s are chambered in 5.56x45mm NATO and therefore support both civilian and military ammunition.

The M4A1 AR15 type firearm is equipped with the RIS II picatinny rail, which has been used by the United States Special Operations Command (SOCOM) for the SOPMOD Block II program since 2005. The M4A1 is built around a 14.5-inch M4 profile barrel forged by cold hammering and a muzzle brake, also serving as a flame reducer, non-removable Daniel Defense. The independently ambient GRIP-N-RIP charging handle fits both left- and right-handed shooters. This rifle also comes with the ergonomic Daniel Defense Buttstock and Pistol Grip.
