The Kimber Rose Gold Ultra II is a high quality semi-automatic pistol, manufactured by the American brand Kimber, renowned for its precise and reliable handguns.

The Kimber Rose Gold Ultra II 9x19 is a semi-automatic pistol that combines luxurious aesthetics, exceptional performance and refined ergonomics, making it a popular choice for enthusiasts of high-quality firearms.

- Caliber 9x19mm
- Aluminum frame with Kimpro matte black finish
- Rose Gold PVD finished stainless steel cylinder head with rear gripping grooves
- 3" (7.62cm) forged steel barrel with 1:16" (406mm) rifling pitch. Stripes on the left
- Raised riser plus handlebars (white three-point sight)
- Ambidextrous safety
- G10 grip
- Capacity: 8+1

- **Finish** : The Kimber Rose Gold Ultra II is known for its rose gold finish, which gives it a luxurious and distinctive appearance. This finish is not only aesthetic but also offers protection against corrosion.
- **Materials** : The carcass is made of aluminum, which guarantees increased durability combined with optimal lightness. The G10 handle ensures a comfortable and secure grip.
- **Engravings and Details** : This model features high quality engravings and details, adding to its premium appearance.

G10 grips are very popular in the world of firearms, especially for pistol grips and knives.

G10 is a very robust composite material, made from layers of fiberglass fabric impregnated with epoxy resin. These layers are then compressed under high pressure and high temperature, resulting in an extremely hard and strong material.

Characteristics of G10 Grips

Durability : G10 grips are extremely resistant to wear, shock and bad weather. They do not crack, break or deform easily, even in extreme conditions.

Moisture Resistance : Unlike wood, G10 does not absorb water, making it ideal for use in humid environments or for weapons intended for heavy use.

Weight : G10 is relatively light compared to other materials like metal, which helps maintain good balance and optimal handling for the weapon.

Textured for a Better Grip : G10 grips can be machined with various patterns to provide a secure and comfortable grip. These textures can range from soft patterns for maximum comfort to more aggressive textures for superior grip.

Chemical Resistance : G10 resists well to oils, solvents and other chemicals commonly used in firearm care.

Advantages of Grips in G10

- **Reliability** : The G10 grips provide a stable and reliable grip, which is crucial for precision and control when shooting.
- **Customization** : Available in a wide range of colors and patterns, G10 grips allow aesthetic customization of the weapon.
- **Ease of Maintenance** : They are easy to clean and maintain, requiring only minimal care to stay in good condition.
