T4 Assembly (GEN-2) - ALUMINIUM safety levers

The T4 lever system is made of high-quality aluminum and, like the old T1 lever, is equipped with an additional safety catch to prevent unintentional opening. The clamping force is fully adjustable and easily compensates for any tolerances of the Picatinny dovetail. The ergonomic shape of the lever makes it easy to handle, even with gloves. The position of the levers can be freely selected forwards or backwards.
