A rifle with a very straight and linear stock configuration, known as "parallel slope", allowing the shooter to always have a similar position of his cheek on the stock, even in the case of a series of intensive shots or rapid aiming.

The receiver and barrel are coated in Cerakote Armor Black. The cantilever, mounted directly to the barrel, is designed to support optics of significant weight; it provides a robust mount and allows the scope's zero to be retained even after disassembling the shotgun. The specific profile of the rubber butt plate contributes to a natural and comfortable shooting posture. Classified as Category C, this version has a 61 cm rifled barrel and a total capacity of 4+1 rounds.

- **Capacity:** 4+1 shots
- **Barrel length:** 61 cm rifled
- **Total length:** 117 cm
- **stock:** fixed synthetic

- **caliber:** 12/76
- **Weight:** approximately 3.2 kg

The **Fabarm** brand has built a reputation for reliable and robust pump-action shotguns. The **Martial Cantilever** model combines ergonomics and efficiency for sport shooters seeking precision.

The FABARM Martial Cantilever is a reliable and high-performance pump-action shotgun, designed for sport shooting enthusiasts and users looking for an effective defense weapon.

The **Fabarm Martial Cantilever** is a Category C pump-action shotgun, designed for sport shooting and live ammunition. Its 61 cm rifled barrel and integrated cantilever rail offer precision and modularity.

Optimized rifled barrel

The 61 cm barrel has **a long twist rifled pattern** , allowing for tight shot patterns and excellent accuracy. This profile makes it a suitable rifle for medium-range target shooting.

Integrated cantilever rail

The **Picatinny cantilever rail** is fixed directly to the barrel, ensuring that the optic's zero is retained even after disassembly. It provides a robust platform for adding scopes or red dot sights.

Proven robustness

The **Ergal 55 receiver** and steel components ensure strength and reliability. Compatible with **12/76 Magnum** ammunition and **steel shot** , the shotgun is pressure-tested to 1630 bar for superior durability.

Shooting comfort

The **straight, parallel-sloping stock** limits muzzle rise and promotes stable and repeatable sight alignment. The integrated pistol grip improves handling during extended sessions.

Modern ergonomics

The textured handguard and smooth pump action facilitate rapid reloading. The front sight with red fiber optics allows for immediate target acquisition, even in low light.

- **Carcass:** Ergal 55
- integrated Picatinny cantilever **rail**
- **Sighting devices:** fiber optic front sight
- **Compatibility:** HP steel balls
- **Test pressure:** 1630 bar
- **Packaging:** cardboard box
