Detect your targets day or night with the PARD Leopard thermal monocular, combining precision, lightness and cutting-edge technology.

The PARD Leopard is a compact and powerful thermal monocular, ideal for observation in low light conditions or in total darkness. Thanks to its high-resolution sensor and digital zoom, it offers a clear and detailed image, perfect for hunting, surveillance or outdoor activities. The LRF models have an integrated laser rangefinder.

- Sensor: Uncooled VOx, 480x360 pixels, 12µm
- NETD: ?20mK
- Lens: 25mm or 35mm
- Optical magnification: 2.5x (25mm), 3.5x (35mm)
- Digital zoom: 2x, 4x, 6x, 8x
- Field of view: 13.1°x9.9° (25mm), 9.4°x7.1° (35mm)
- Detection: 800 to 1800 meters
- Screen: AMOLED, 1920x1080 pixels
- Scene modes: city, forest, rain
- Color palettes: WT-HOT, BK-HOT, EDGE, RD-HOT, IN-HOT, SKY
- Laser rangefinder: range up to 1000m
- Storage: Micro SD card up to 128GB
- Connectivity: USB Type-C, Wi-Fi

- Battery: 18650 lithium-ion, runtime up to 6 hours
- Protection index: IP67

The PARD Leopard thermal monocular is designed for demanding users looking for a lightweight, high-performance and versatile device. Equipped with a high-definition thermal sensor, it detects heat sources at long distances, even in the most difficult environments, such as dense fog or moonless nights.

With its integrated OLED screen, the Leopard displays sharp, high-contrast images, allowing for quick target identification. Its digital zoom allows for precise observation of distant details, making this tool ideal for hunting, scouting or surveillance.

Leopard also offers multiple thermal color palettes, suitable for different scenarios: hot white, hot black, red or fusion mode, for optimal adaptation to the user's specific needs.

Its compact and ergonomic design ensures a comfortable grip, even for extended observation sessions. Powered by a rechargeable battery, it offers extended autonomy, ideal for field trips.

Resistant to shocks, weather and extreme temperatures, the PARD Leopard is built to last, whatever the conditions. Compatible with tripods for increased stability, it also incorporates modern features such as video recording or real-time transmission via Wi-Fi (depending on the model).

Choose the 850nm version for maximum distance detection or the 940nm version for maximum discretion.

- Dimensions: 169x58x48 mm
- Weight: 360g (with battery)
