Transform your day scope into night vision in the blink of an eye with the PARD NV007V, offering detection up to 350 meters.

The PARD NV007V is a digital night vision module that easily attaches to the back of your riflescope, instantly converting it into a night vision device. With a 1920x1080 pixel CMOS sensor and a 1024x768 OLED display, it delivers a clear and detailed image, day or night. Its built-in infrared illuminator, available in 850nm or 940nm versions, provides effective detection up to 350 meters.

Technical characteristics:

- Sensor
- Screen
- Infrared illuminator
- Detection range
- Optical magnification
- Digital zoom
- Battery life
- Recoil resistance
- Waterproof
- Weight
- Dimensions
- Video recording
- Wi-Fi Connectivity
- Compatibility

The PARD NV007V stands out for its ability to transform your daytime scope into night vision in just a few seconds, thanks to its quick-mount adapter. Its high-resolution 1920x1080 pixel CMOS sensor ensures exceptional image quality, while the 1024x768 OLED display guarantees comfortable viewing in various lighting conditions. The integrated infrared illuminator, available in two wavelengths (850 nm for maximum

range and 940 nm for more discreet use), offers reliable detection up to 350 meters.

Built to withstand recoil up to 6000 joules, the NV007V is compatible with a wide range of calibers, ensuring increased durability and reliability. It also features Full HD (1920x1080) video recording and photo capture (2608x1944), with up to 128GB microSD card storage, allowing you to document your shooting or hunting experiences.

The module features built-in Wi-Fi connectivity, facilitating live streaming and remote control via compatible iOS or Android devices. It is powered by a rechargeable 18650 lithium-ion battery, providing up to 8 hours of battery life, with the option of external power via a USB Type-C port.

With compact dimensions (114 x 97 x 50 mm) and light weight (268 g), the PARD NV007V is designed for practical use and easy handling in the field. Its robust construction made of high-quality aluminum and plastic ensures protection against the elements, with a waterproof rating of IP67.

Choose the 850nm version for maximum distance detection or the 940nm version for maximum discretion.
