OR5B21700	Pard batterie 21700	Vente libre	31.00 € incl. tax

PARD's 21700 lithium-ion battery offers an exceptional capacity of 5000mAh, ensuring extended use of your night vision devices without interruption.

This PARD 21700 lithium-ion rechargeable battery, with a nominal capacity of 5000mAh, is specially designed to efficiently power your night vision devices, ensuring increased battery life during your nighttime activities.

Technical characteristics:

- **Battery Type** : Lithium-ion 21700
- **Nominal capacity** : 5000mAh
- **Certification** : MSDS
- **Compatibility** : PARD Night Vision Devices
- **Rechargeable** : Yes
- **Nominal voltage** : 3.7V

The PARD 5000mAh rechargeable battery is an ideal choice for night vision device users who require a reliable and long-lasting power source. With its high capacity, it can significantly extend the usage time of your devices, reducing the need for frequent charging and giving you a smoother experience during your nighttime observations.

Designed based on the 21700 model, this lithium-ion battery features superior energy density while maintaining a compact size suitable for PARD night vision devices. Its MSDS certification attests to its compliance with safety standards, ensuring you can use it with complete peace of mind.
