■ Dimensions

The PARD Night Stalker 4K riflescope is designed for demanding shooters who require optimal performance in all circumstances. Its 4K CMOS sensor offers an impressive resolution of 3840x2160 pixels, ensuring sharp and detailed images, essential for accurate target identification.

The built-in laser rangefinder provides accurate distance measurements up to 1,200 yards, making it easier to estimate ranges and improve the accuracy of long-range shots. Combined with the advanced ballistic calculator, it helps determine necessary adjustments based on distance and environmental conditions.

The Night Stalker 4K features a circular 800x800 pixel LTPS display, providing clear and comfortable viewing. Its 100mm eye relief ensures a secure shooting position and reduces eye fatigue during long sessions.

The integrated VCSEL infrared illuminator, available in 850nm or 940nm wavelengths, provides an effective range of up to 350 meters in total darkness, ensuring optimum visibility without alerting game.

Constructed from high-grade aluminum alloy, the scope is weather-resistant with an IP67 certification, ensuring protection against dust and temporary immersion in water. It is also designed to withstand recoil up to 6000 joules, making it compatible with a wide range of calibers.

Additional features include 1080p video recording, built-in Wi-Fi for live streaming, multiple reticle styles and colors to suit user preferences, and extended runtime with a rechargeable 18650 battery.

Choose the 850nm version for maximum distance detection or the 940nm version for maximum discretion.

- **Weight** : Approx. 680g (without battery)
- **Dimensions** : 396mm x 125mm x 110mm
