Enhance your shooting experience with the PARD Ocelot, a compact and powerful thermal scope for unmatched accuracy, day or night.

The PARD Ocelot is a thermal riflescope available in 480x360 or 640x512 sensor resolutions, with a pixel pitch of 12µm and a thermal sensitivity (NETD) of ?20mK, ensuring clear and detailed images. Its integrated laser rangefinder allows precise measurements up to 1,000 meters, while its compact and lightweight design facilitates its use in the field.

Technical characteristics:

- Thermal sensor
- Thermal sensitivity (NETD)
- Laser rangefinder
- Digital zoom
- Display
- Display Modes
- Video recording
- Connectivity
- Power supply

- Dimensions

The PARD Ocelot thermal scope stands out for its ability to deliver high-quality thermal images, even in low-light or total darkness. Its advanced sensor, available in 480x360 or 640x512 resolutions, combined with a 12µm pixel pitch and a thermal sensitivity (NETD) of ?20mK, can detect even the smallest temperature

variations, providing precise target identification.

The built-in laser rangefinder provides a measuring range of up to 1,000 yards, making it easy to estimate distances for accurate long-range shots. The scope also features up to 8x digital zoom, allowing you to adjust the magnification to suit the specific needs of each situation.

Built to withstand the harshest conditions, the PARD Ocelot is constructed from aircraft-grade aluminum alloy for increased strength and durability. Its IP67 rating ensures dust and water resistance, allowing for reliable use in all weather conditions.

Additional features include a built-in video recorder, Wi-Fi connectivity for live streaming, and multiple display modes and color palettes to suit user preferences and different viewing situations.
