**The PARD TA32 thermal monocular offers precise detection up to 2,000 meters thanks to its high-sensitivity sensor and integrated laser rangefinder.**

The PARD TA32 thermal monocular stands out for its advanced technical features, offering users an enhanced observation experience. Its high-resolution 384x288 pixel thermal sensor, combined with a pixel size of 12 µm and a thermal sensitivity (NETD) of 25 mK or less, ensures accurate detection of even minimal temperature differences.

The 25mm objective lens offers 3.5x optical magnification, complemented by up to 8x digital zoom, allowing detailed observation of targets at different distances. The 15mm eye relief ensures optimum comfort during use, while the 1024x768 pixel OLED display provides a clear and sharp image.

The built-in laser rangefinder, with a range of up to 1,000 meters, makes it easy to accurately estimate distances. The video recording function helps capture important moments, ensuring that every meaningful observation is recorded.

Additionally, the monocular is equipped with a rechargeable 18650 battery providing up to 6 hours of battery life, and its rugged design with IP67 waterproofing makes it suitable for the most demanding environments.

- **Dimensions** : 186x75x55 mm
- **Weight (without battery)** : 300 g
- **Color palettes** : White Hot, Black Hot, Red Hot, Iron Hot, Edge, Sky
