Transform your daytime scope into a high-performance night vision device with the PARD NV007SP, providing clear observation up to 350 meters.

The PARD NV007SP is a digital night vision module that easily attaches to the eyepiece of your riflescope, converting it into a device that can be used day or night. Featuring a high-resolution 2560x1440 pixel CMOS sensor and a 1024x768 pixel OLED display, it ensures sharp images in low-light conditions. Its built-in infrared illuminator, available in 850nm or 940nm versions, ensures optimal visibility up to 350 meters. Lightweight and compact, with a battery life of up to 8 hours, the NV007SP is the ideal tool for hunters and night-time enthusiasts.

- **Laser rangefinder function (LRF):** Up to 1100 m / depending on model
- **Sensor** : CMOS 2560x1440 pixels
- **Display** : OLED 1024x768 pixels
- **Infrared illuminator** : 850nm or 940nm
- **Detection range** : up to 350 meters
- **Optical magnification** : 4x
- **Digital zoom** : 1x to 3.5x
- **Continuous digital zoom** : 4x to 14x
- **Eye relief** : 25 mm
- **Diopter adjustment** : ±5D
- **Video recording** : resolution 1920x1080 pixels
- **Wi-Fi Connectivity** : Yes
- **Battery life** : up to 8 hours with 18650 battery
- **Recoil resistance** : up to 6000 joules
- **Waterproof** : IP67

The PARD NV007SP stands out with its advanced technical features, offering users an enhanced nighttime observation experience. Its high-resolution 2560x1440 pixel sensor, combined with a 1024x768 pixel OLED display, ensures superior image quality.

The integrated infrared illuminator, available in two wavelengths (850nm for increased range and 940nm for maximum discretion), allows adaptation to the specific needs of each user. The device is designed to withstand recoil up to 6000 joules, making it compatible with a wide range of calibers.

Additionally, its IP67-rated waterproof design ensures reliable use in adverse weather conditions. Lightweight, weighing approximately 290 grams without the battery, and with a runtime of up to 8 hours thanks to its rechargeable 18650 battery, the NV007SP is both portable and durable.

It also offers additional features such as video recording in 1920x1080 pixels resolution, connectivity

Choose the 850nm version for maximum distance detection or the 940nm version for maximum discretion.

- **Weight** : about 290 grams (without battery)
- **Dimensions** : 105x71x120 mm
