Fiber optic illuminated reticle.

Optimize your shooting sessions with the Microdot Fiber 2.5-10x50 scope. With its variable magnification from 2.5 to 10x and its illuminated 50 mm objective, it ensures precise shots, even at long distances. The parallax adjustment (AO) and the Mil-Dot reticle guarantee clear aiming and quick adjustment. The Fiber range has a reticle illuminated by fiber optics.

Technical characteristics:

- **Magnification:** 6-24
- **Lens diameter:** 50 mm
- **Reticle Type:** Illuminated Mil-Dot
- **Parallax adjustment:** Adjustable (AO)
- **Turrets:** Manual elevation and windage adjustment
- **Body:** Impact-resistant anodized aluminum
- **Nitrogen purged** for complete sealing
- **Waterproof:** Splash resistant
- **Accessories included:** Mounting clamps
- **Recommended use:** hunting and sport shooting

A scope designed for versatile hunting

With its **2.5x to 10x** magnification, this scope covers most hunting situations. In driven hunts or in dense cover, the lower magnification allows for rapid target acquisition. Conversely, when stalking or hunting from a blind, it offers the necessary precision for more deliberate shots.

Excellent brightness in difficult conditions

The **50mm** lens effectively captures light. In practical terms, this translates to improved visibility during the early morning and late afternoon hours - crucial times for hunters. The image remains

sharp and usable even as the light fades.

Illuminated reticle for rapid acquisition

The **illuminated Mil-Dot** reticle makes it easier to acquire a target, especially in dark or high-contrast environments. The illumination provides real comfort without obscuring the target.

Parallax adjustment for precise shooting

The **AO** system allows parallax to be adjusted according to the distance. This improves image sharpness and reduces aiming errors, a significant advantage for accurate shots at medium range.

Robustness and reliability in the field

Its **anodized aluminum** body withstands outdoor conditions. Nitrogen purging limits internal fogging, ensuring reliable use in humid or variable weather.

Additional features

- **Use:** Hunting (ambush, stalking, stationary shooting)
- **Resistance:** Splashproof
- **Ergonomics:** Simple and accessible settings
- **Comfort:** Clear image in low light

FAQ

Is this scope suitable for driven hunts?

It can be suitable for light driven hunts thanks to its minimum magnification of 2.5x, but it is especially optimal for hunting from a blind and stalking.

How well does it perform in low light?

Yes, its 50mm objective lens and illuminated reticle offer good visibility at dawn and dusk.

What type of hunting is most suitable?

It is ideal for hunting from a blind and stalking, as well as for shooting from a stationary position at medium range.
