A versatile viewfinder, designed to last

Ideal for **dynamic shooting** or **recreational shooting** at short and medium ranges, this Microdot MS10 sight combines **rapid target acquisition** and **precision** thanks to its multi-reticle technology. Its open design allows for a wide field of view without loss of field of view, perfect for quick target changes.

Japanese manufacturing is a guarantee of quality: Japan is recognized worldwide for its excellence in the **optical industry** . Each component is designed to offer reliability, durability, and precision, even under demanding conditions.

Comfort and ergonomics on the field

This sight adapts to all shooters thanks to its **intuitive selection control** , allowing easy switching between reticles depending on the situation. It also offers precise **windage** and **elevation** adjustments for fine-tuning your aim. The **integrated Weaver mount** ensures quick and secure attachment.

- **Viewfinder type:** open reflex viewfinder
- **Finish:** matte black, anti-reflective
- **Number of intensity levels:** 7 brightness levels
- **Weight:** approximately 120 g
- **Usage:** ambidextrous

FAQ

Is this sight suitable for hunting rifles?
Yes, for **category C** hunting rifles with compatible rail, it allows for **rapid aiming** during driven hunts.

Can it be used with prescription glasses?
Yes, its **large viewing window** allows for comfortable use, even with corrective glasses.

Does changing the reticle alter the point of impact?
No, the reticle change is purely visual; the **point of impact remains the same** once adjusted.

Is it weather-resistant?
It offers good **resistance to splashes** and moisture, for moderate outdoor use.

What is the battery life?
Approximately **200 hours of continuous use** depending on the light intensity used.
