OCS0100	MICRODOT SIGHT MS10	Vente libre	4.6	2.8	2.9	30	Multiréticules	399.00 € incl. tax

With its compact design and multi-reticule system, the Microdot Sight MS10 offers unmatched precision and optimal adaptability for all your shooting disciplines.

The Microdot Sight MS10 is a latest generation red dot sight, designed to offer fast and efficient target acquisition. Thanks to its different interchangeable reticles, it adapts to all situations, whether you are at the shooting range, in hunting action or on a tactical mission. Its robust aluminum structure ensures excellent resistance to shocks and wear, while its lens treatment guarantees exceptional clarity and glare-free vision.

The Microdot Sight MS10 red dot holographic is ideal for shooting enthusiasts looking for performance and practicality. With its integrated multi-reticule system, it offers several reticle options adapted to each situation. Whether for precision shots or rapid shots, the MS10 guarantees immediate target acquisition, optimizing your performance.

The MS10's structure, made of aeronautical aluminum, ensures lightness and durability, even in the most demanding environments. Equipped with an advanced anti-reflective treatment, it offers a clear and bright image, without distortion. The intuitive side controls allow quick adjustment of the brightness to adapt to all light conditions.

Additionally, the optic is compatible with most standard mounts, making it easy to integrate onto your favorite weapons. This model is also water and weather resistant, perfect for outdoor use.

With the Microdot Sight MS10, every detail has been designed to provide a superior shooting experience. Its advanced technology and ergonomic design make it a must-have tool for professional and amateur shooters alike.
