Meet the Kimber 2K11 Target OR, a double-stack 1911 pistol in 9x19mm caliber, designed to deliver unmatched accuracy and optimal capacity for demanding shooters.

The Kimber 2K11 Target OR features a stainless steel chassis with a matte DLC finish, ensuring durability and corrosion resistance. Its Type III anodized aluminum grip module ensures a comfortable and secure grip. Equipped with a 5-inch fluted barrel with 5R threads and a target crown, this pistol delivers exceptional accuracy with every shot. The magazine capacity is 20+1 rounds, ideal for intensive shooting sessions. In addition, the 2K11 Target OR is optics ready, with a C&H Precision RMR adapter plate included, making it easy to customize to the shooter's preferences.

Technical characteristics

- **Caliber** : 9x19 mm
- **Magazine capacity** : 20+1 rounds
- **Barrel Length** : 5 inches (12.7 cm)
- **No scratch**: 1;10" (254 mm)
- **Chassis material** : Stainless steel with matte DLC finish
- **Handle Module** : Type III Anodized Aluminum
- **Sighting System** : TAG FiberLok 2 Red Front Sight and Integrated Rear Sight
- **Optical Compatibility** : C&H Precision RMR adapter plate included
- **Weight** : 40.1 ounces (1.14 kg)
- **Total length** : 8.56 inches (21.74 cm)

- **Safety** : Ambidextrous
- **Accessories included** : Three chargers

Robust chassis and high-strength finish

The Kimber 2K11 Target OR chassis is made of stainless steel, a material known for its strength and durability. It has a matte DLC (Diamond-Like Carbon) finish, offering exceptional resistance to wear, scratches and corrosion. This treatment ensures maximum durability of the gun, even in harsh environments or during intensive use.

The Type III anodized aluminum handle module reinforces this solidity while maintaining a controlled weight. It also offers an excellent grip thanks to its optimized ergonomics, guaranteeing comfort and control during prolonged shots.

Increased Accuracy with 5-inch Barrel

The heart of the Kimber 2K11 Target OR's performance lies in its 5-inch fluted barrel, designed to maximize accuracy. The 5R thread improves projectile stabilization while reducing barrel fouling, ensuring consistent performance and extended barrel life.

The target crown located at the end of the barrel optimizes accuracy by protecting the internal grooves from damage and improving projectile release. This attention to detail allows shooters to achieve accurate results, even at long distances.

Maximum Capacity and Loading Ergonomics

Designed for the most demanding shooters, the Kimber 2K11 Target OR offers an impressive capacity of 20+1 rounds in 9x19mm caliber thanks to a double-stack design. This increased capacity reduces the number of reloads during competitions or intensive training.

The enlarged magazine well facilitates fast and smooth reloads, a key benefit for shooters seeking efficiency on the firing line. The pistol comes with three magazines to ensure extended range during shooting sessions.

High Precision Aiming System and Optical Preparation

The Kimber 2K11 Target OR features a precision-optimized sighting system. The red TAG FiberLok 2 front sight provides excellent visibility in varying light conditions, while the rear sight, integrated into the cover plate, allows for fast and accurate target acquisition.

The pistol is also optics-ready with the included C&H Precision RMR adapter plate. This compatibility allows shooters to add a red dot sight for even faster and more accurate aiming, meeting the demands of competitors or precision enthusiasts.

Modularity and Customization

The integrated Picatinny rail under the barrel offers the possibility of adding accessories such as tactical lights or lasers, thus increasing the versatility of the 2K11 Target OR. This modularity allows the weapon to be adapted to different shooting environments or specific needs.

The ambidextrous safety ensures easy handling whether you are right or left-handed. In addition, the tool-free guide rod system simplifies disassembly and maintenance, facilitating regular maintenance of the gun without the need for special equipment.
