OR0210300P	PACK Pard NV lunette Night Stalker mini / 35mm + lampe 850	Vente libre	549.00 € incl. tax

Optimal night detection up to 300 m thanks to the Night Stalker Mini scope and the 850 nm IR torch, for discreet and efficient observation.

This PARD package combines the performance of the Night Stalker Mini 35mm thermal scope with the power of an 850nm infrared lamp. It offers excellent nighttime image quality, ideal for hunters on the prowl or for nighttime operations. Compact and easy to use, it guarantees rapid target identification, even in total darkness.

- **Optics Type** : Compact Thermal Scope
- **Lens** : 35 mm
- **Detection Technology** : High-resolution thermal sensor
- **Detection range** : Up to 300 m
- **Digital zoom** : Yes, with PIP mode
- **Vision Modes** : Multiple thermal palettes
- **Recording** : Integrated photo & video
- **Power supply** : Rechargeable battery (optimized autonomy)
- **Waterproof rating** : IP67
- **Interface** : Multilingual, intuitive menu
- **IR Lamp** : Infrared 850 nm
- **IR lamp range** : Up to 300 m
- **IR lamp beam** : Adjustable (wide or narrow focus)
- **Mounting** : Mounting system included
- **Weight** : Lightweight and compact for mobile use

A complete package for long-distance night vision

The PARD **Night Stalker Mini 35mm Thermal Scope and 850nm Infrared Flashlight Combo** offers a premium night vision solution designed for demanding users such as hunters, shooters, and security

professionals.

Night Stalker Mini 35mm Thermal Scope: Compact Performance

This compact thermal scope combines a **35mm lens** with a **high-definition sensor** for **thermal detection up to 300 meters**. Its small size makes it easy to mount on a weapon or for handheld use. It offers multiple color palettes, a Picture-in-Picture (PIP) mode, and an intuitive interface, making it a versatile and powerful tool for all night conditions.

The Night Stalker Mini also features an **intuitive aiming system** with digital magnification and built-in video recording. Its lightweight construction makes it a discreet ally for hunters on the lookout or for extended observation.

PARD 850nm Infrared Flashlight: Invisible Lighting Enhancement

The perfect complement to the scope, the **850nm IR flashlight** emits infrared light invisible to the naked eye, ideal for enhancing night vision illumination without alerting game. It features an **adjustable beam**, a **range of up to 300m** and easily attaches to an optic or weapon thanks to its included mount.

Pairing this flashlight with the Night Stalker scope maximizes identification range while maintaining maximum discretion. It's ideal for nighttime hunting, pest control, or surveillance missions.

Key Technologies and Benefits

- **High-resolution thermal vision** : precise sensor for reliable detection of thermal signatures.
- **Built-in recording** : Capture photos and videos directly from the lens.
- **Optimized autonomy** : powered by long-lasting rechargeable batteries.
- **IP67 waterproof** : resistant to extreme weather conditions.
- **Universal mounting** : compatible with many rails and fixings.
- **Multilingual interface** : simplified configuration for all users.

This pack represents a complete solution for night vision enthusiasts looking for reliable, discreet and effective equipment, whether for hunting, security or wildlife observation.
