The Victrix Target T are designed for long range or very long range shooting.

The Victrix Target T MKII is a single-shot, short-bolt precision rifle made of AISI 630 stainless steel. Its AISI 420 rifled barrel with **Lothar Walther** button-type grips and its composite stock with carbon fiber components prioritize overall rigidity. The **Anima®** system, the integrated 20 MOA rail, and the Anschutz rail for a bipod create a platform designed for resting and shooting positions.

- **Calibers and twist rates:** 308 Match (1/11), 308 Match (1/10), 6.5 Creedmoor (1/7.5), 6.5×47 Lapua (1/7.5), 6.5 Creedmoor (1/8.5) or 6.5×47 Lapua (1/8.5)
- **Barrel:** Lothar Walther in AISI 420, rifled with buttons, stainless steel finish, 1-inch muzzle
- **Barrel length:** 30 or 32 inches
- **Weight without scope:** 6.59 kg with a 30-inch barrel or 6.81 kg with a 32-inch barrel
- **Overall length:** 1256 mm with a 30-inch barrel or 1307 mm with a 32-inch barrel
- **Overall finish:** Razor Grey
- **Stock:** composite with carbon fiber components
- **Stock system:** Anima® with monolithic lightweight alloy base
- **Adjustments:** 3° angled rear slider, horizontally and vertically adjustable rubber butt plate, adjustable carbon fiber cheek piece

- **Action rail:** 20 MOA integrated rail
- **Bipod rail:** Anschutz-type rail made of lightweight alloy
- **Bolt:** Short, single-shot bolt made of AISI 630 stainless steel, milled and turned from a billet.
- **Locking mechanism:** six symmetrical lugs and integrated grooves for dirt and ice removal
- **Treatment:** PVD finish on the action and slide
- **Trigger pull:** Victrix Sporting T adjustable single stage, standard setting of approximately 250g
- **Case:** Explorer Cases carrying case, reference 13513
- **Accessories included:** user manual and welcome kit
- **Accessories not included:** rifle scope and bipod

Designed for **precision target shooting** and long-range shooting configurations, the Target T MKII is available in various calibers, twist rates, and barrel lengths. Scopes and bipods are sold separately.

A platform derived from the Sporting series

The **Target T MKII** adopts the approach of the **Victrix Sporting Systems** series, developed around precision machining and competitive shooting. Its common design allows for several variants to be presented on the same datasheet, with dimensional characteristics that vary depending on the chosen configuration.

Composite stock and Anima® system

The composite stock incorporates **carbon fiber** components designed to maximize its rigidity. The **Anima®** system adds a monolithic, lightweight alloy base inside the stock. In practice, the shooter also benefits from a 3° canted rear slider, an adjustable cheek piece, and a butt plate with horizontal and vertical adjustments to customize their shooting position.

Lothar Walther barrel and short breech

The **Lothar Walther** barrel, made of AISI 420 stainless steel, features button-rifling and a stainless steel finish, with a 1-inch muzzle. Available options include several caliber and twist rate combinations, as well as two barrel lengths. The short, single-shot bolt, made of AISI 630 stainless steel, is milled and turned from a billet; its six symmetrical lugs are complemented by grooves designed to evacuate dirt and ice.

Assembly and adjustment of the trigger

The integrated 20 MOA action rail provides a dedicated mounting base, while the lightweight alloy Anschutz-style rail is designed to accommodate a bipod. The **Victrix Sporting T** single-stage trigger is adjustable, with a standard setting of approximately 250 g. These features allow the rifle to be configured for the chosen shooting setup.

Case and accessories

The package includes a reinforced **Explorer Cases 13513** carrying case, an instruction manual, and a welcome kit. The scope and bipod are not included; their selection will depend on the equipment already in use and the chosen configuration.

Regulatory framework

This rifle is classified as a **Category C** firearm. Its purchase is subject to declaration. Depending on the buyer's situation and the specific product, supporting documents may include identification and a valid hunting permit or shooting license. Transport requires a legitimate reason, and the firearm must be rendered immediately unusable. Storage must comply with the regulations applicable to Category C firearms; ammunition must be stored separately from the firearm.
