Victrix Small Bore: high precision .22LR caliber bolt-action rifle.

The **Victrix Target Small Bore MK2** is a single-shot bolt-action rifle chambered in **.22 LR** , designed for target shooting. Its special steel barrel, available in 24 or 27 inches, is housed in a composite stock reinforced with carbon fiber components for increased rigidity. The **Anima®** system, combined with the monolithic lightweight alloy receiver, provides a stable and precisely adjustable platform. The carbon cheekpiece, adjustable forend (horizontally and vertically), and 3° canted rear slide allow for a customized grip to suit the shooter's position. The AISI 630 action, machined from a single piece of steel, features a removable 20 MOA rail, while the Anschutz-style rail facilitates the mounting of a compatible bipod. The bolt, with its two asymmetrical rear lugs, offers quick removal, a dual extractor, and an interchangeable bolt handle. Its Victrix Sporting V single-stage trigger is adjustable, with a standard setting of around 40g. Supplied with a reinforced case, manual and welcome kit, it is offered without a scope or bipod.

- **Caliber/Pitch:** .22 LR, 1/16 twist rate
- **Barrel length:** 24 or 27 inches, with threaded barrel option
- **Weight:** 5.67 to 5.98 kg depending on barrel length and configuration
- **Closed dimensions:** 1093 mm with a 24-inch barrel; 1169 mm with a 27-inch barrel
- **Deployed dimensions:** 1133 mm with a 24-inch gun; 1209 mm with a 27-inch gun
- **Finish:** Razor Grey, special steel barrel with black CERAKOTE matte finish
- **Stock:** composite with monocoque carbon fiber components
- **Adjustments:** Carbon fiber cheekpiece, integrated rubber heel adjustable horizontally and vertically

- **Stock system:** Anima® with monolithic lightweight alloy housing
- **Rails:** Removable 20 MOA action rail and Anschutz-type bipod rail
- **Action:** Single-shot mechanism machined from solid AISI 630
- **Bolt:** two asymmetrical rear lugs, 60° lift, quick disassembly, double extractor and interchangeable lever
- **Treatment:** PVD finish on the action and the slide
- **Trigger pull:** Victrix Sporting V adjustable with one stage, standard setting of approximately 40g
- **Included equipment:** reinforced carrying case, user manual and welcome kit
- **Equipment not included:** scope and bipod
- **Category C**

Designed for target shooting, this configuration brings together the essential settings around a single-shot action and a stock designed to limit unwanted flexing.

A stock designed for adjustment

The composite stock incorporates carbon fiber components and a monolithic lightweight alloy housing. Adjustable cheekpiece and butt plate allow for fine-tuning the shooter's grip. A 3° angled rear slide completes the package, further enhancing length and comfort.

Action and breech

Machined from a solid block of AISI 630 steel, the action features a PVD finish and a removable 20 MOA rail. The bolt with two asymmetrical rear lugs is distinguished by its 60° lift angle, quick-release system, double extractor, and interchangeable ergonomic lightweight alloy lever.

Assembly and equipment

The Anschutz-style rail on the stock is designed for mounting a compatible bipod. The barrel is available in 24 or 27 inches, with threaded configurations. After shooting, the reinforced case facilitates transport and storage. The scope and bipod are sold separately.
