Versatile semi-automatic rifle for sport shooting.

A modern rifle designed for **sport shooting**, the **Schmeisser AR15 M4FL Bronze** combines precision, modularity and shooting comfort. Its bronze finish gives it a strong aesthetic identity, while its ambidextrous ergonomics and comprehensive equipment make it a popular choice for demanding shooters.

- **caliber:** .223 Remington
- **barrel length:** 368 mm / 14.5"
- **no scratch:** 1:9
- **total length:** 795-895 mm
- **weight:** 3250 g
- **magazine capacity:** 10 rounds
- **system:** semi-automatic
- **stock:** adjustable 6 positions with shock-absorbing butt plate
- **Mounting rail:** Continuous Weaver / Picatinny
- **accessories supplied:** case, cleaning kit, charger, tools

Ergonomics and comfort

The **Schmeisser AR15 M4FL Bronze** rifle features a 6-position **adjustable stock**, allowing for a custom length for every size. The rubber buttplate effectively absorbs recoil for a more comfortable and stable shot during long range sessions.

Continuous Picatinny rail

A **Weaver/Picatinny rail** extends across the entire upper part of the rifle. It allows the installation of a wide range of optics or accessories (red dot sights, rifle scopes, folding sights included as standard). This modularity is particularly appreciated by shooters looking for a scalable

configuration.

M-LOK handguard

The aluminum handguard is equipped with multiple **M-LOK** slots, a modern accessory attachment system. Lighter and more robust than older systems, it allows you to add lamps, grips or bipods securely and without adding unnecessary weight to the weapon.

Two-step relaxation

The **two-stage trigger** offers a smooth initial stroke followed by a sharp hard point, improving the consistency and accuracy of the shot. This system is particularly sought after for precision disciplines with semi-automatic rifles.

Total ambidexterity

All of the rifle's controls are **ambidextrous** : the enlarged cocking lever, safety, and magazine ejector. This practical feature makes the rifle accessible to both right- and left-handed users.

Adjustable gas block

The **adjustable gas block** allows the rifle's operation to be adapted to different types of ammunition or accessories (such as a sound moderator, in countries where their use is authorized). By adjusting the gas pressure, the shooter optimizes the reliability of the cycle and limits mechanical fouling.

- **barrel thread:** with flash suppressor
- **handguard material:** aluminum
- **type of relaxation:** two-stroke
- **controls:** ambidextrous
- **sights:** folding included
